[Professional Profile | LinkedIn](#)

"Skilled UI Engineer adept in crafting exceptional **web** and **mobile** experiences using **HTML**, **CSS**, **JavaScript**, React, Angular, and **WordPress**. Known for optimizing for **speed**, **accessibility**, and **SEO**. Expertise in redesigning websites, creating custom UI elements, and optimizing assets. Proficient in Adobe Photoshop/Illustrator for **design**. **Collaborative** team player, fluent in multiple languages, committed to delivering top-notch results."

EXPERIENCE

Webinos Inc, Freelance— *Wordpress Developer*

Jun 2022 - Feb 2023

- Successfully managed multiple **WordPress**-based websites, ensuring their functionality, performance, and **visual** appeal.
- Developed custom **Gutenberg** blocks and fields to empower clients with intuitive site **management** capabilities, enhancing their control over content and **layout**.
- Collaborated closely with clients to understand their **specific requirements** and extend website functionality **accordingly**, providing tailored solutions to meet their needs.
- Demonstrated adaptability by incorporating client-requested features and improvements into existing projects, contributing to customer satisfaction and project success.

SmartBet — *Markup specialist*

Sep 2020 - Jul 2021

- Led the comprehensive redesign of the primary project's user interface, with a specific focus on **enhancing** user experience and visual appeal. Key considerations included:
- Easy theming: Implemented a **theming** system that allowed for seamless **color scheme** changes across the entire site using a single file.
- **Dark/light** modes: Ensured that each color scheme featured both dark and light mode options, catering to user preferences. Mobile optimization:
- Developed a **mobile-responsive** version of the website, ensuring that it met the criteria for easy theming and dark/light modes.
